Professional Profile

I am a recent graduate and a Junior Software Developer who enjoys building web, mobile, and ERP solutions. I continuously work on improving my coding skills and developing practical software. Recently, I have been focusing on cybersecurity, learning how to identify vulnerabilities and keep applications secure by applying best practices. Additionally, I am gaining hands-on experience with ethical hacking techniques to better understand and fix security issues.

Together with coding and security, I have a foundational understanding of Cisco networking, the Linux operating system, and general IT concepts, which helps me develop more analytical solutions when solving problems.

I am a curious and dedicated worker and team player who believes that good communication and collaboration are best key to successful projects. In addition to writing clean and maintainable code, I always prioritize quality by following standards and best practices in hardware related IT.

Career Summary

May 2025 – August 2025

The Code Republic OÜ, İstanbul – Fullstack Developer Intern

Outline

Responsible for the web development, management and testing of software in backend and frontend areas, including database operations using Supabase.
